## Skills

---

**Frontend:** ReactJS, Next.js, Tailwind CSS, Bootstrap, Figma

**Backend:** Node.js, Express, REST API, GraphQL Socket.io, MySQL, MongoDB, Redis, Supabase, DynamoDB

**DevOps and AI/ML:** Git/GitHub, Linux, AWS, Vercel, Docker, Bash, Python, Flask, FastAPI, Langchain

**Languages:** C/C++, Java, JavaScript

## Education

---

**VCET, Vasai**

**Expected Jun 2026**

*B.E. in Computer Engineering*

*Current CGPA: 9.45/10*

- Relevant Coursework: OOPs, Data Structures and Algorithms, Operating System, Computer Network.

## Projects

---

**Legal Mitra (2025)** | [🔗 Code](#) | [📺 Demo](#)

*[React, Express, MongoDB, NLP, RAG, VectorDB, FastAPI]*

- Developed a smart **legal assistance platform** simplifying access to Indian laws with a trusted legal database.
- Enabled **real-time legal news updates**, location-based lawyer discovery, and **PDF chat using RAG architecture**.
- Delivered concise legal **answers with linked articles** using dataset **aggregation queries** and LLM-based summary.

**Scorezy (2024)** | [🔗 Code](#) | [📺 Demo](#)

*[React, three.js, Redux, Cloudinary, Auth0, Tesseract, face-api]*

- Built a **proctored exam automation** and monitoring tool, with secure **admin panel**, exam portal for exam integrity.
- Implemented **tab-switch prevention**, randomized questions, **face detection**, and formula-based scores generation.
- Enabled admins to create exams and their papers easily, and **convert Word files to questions in 3 seconds**.

**PenPalette (2024)** | [🔗 Code](#) | [📺 Demo](#)

*[React, framer-motion, Web Canvas, Jodit, Nodejs, Firebase]*

- A Digital **book reading and publishing platform** with advanced features for content organization and publishing.
- Built a **custom book editor** to add/edit chapters, save books by others, **enabled commenting**, and adding tags.
- Added utilities such as adjustable font size, dark-light theme, **chapter and page navigation**, link and image support.

## Work Experience

---

**Quizitt India Pvt. Ltd., Internship**

**May 2025–June 2025**

*Software Engineer*

- Worked on **end-to-end document caching system** using **Redis** to accelerate **extracted data retrieval**.
- **Led an online team**, interfacing backend with frontend, and implemented **slug-based routing** for content posting.
- Created a **chatbot on custom data**, deployed with **FastAPI**, and added **NSFW detection** for media content.
- Managed **version control**, merge conflicts, testing and **debugging**, and applied **Lazy Loading** for scalability.

**Aspiring Web Solutions Pvt. Ltd., Internship**

**Oct 2024–Dec 2024**

*Full Stack Developer*

- Built **two advanced features** for the company's Banquet Management System to **automate Manual Bookings**.
- Created a **PHP-based solution** linked with **PostgreSQL** to **auto-generate receipts** through XML integration.
- Cut business processing time from **4–5 days** to a **few hours** with **100% precision**, syncing with Tally Software.

## Achievements and Certificates

---

- Ranked **1st in Computer Engineering Department** with an outstanding **9.75 CGPA**.
- **Published 2 copyrights** and **registered 1 patent** for innovative academic projects. [Certificate](#)
- Winner of **Code-o-Fiesta State-Level Hackathon**, demonstrating strong problem-solving. [Certificate](#)
- Awarded **1st prizes** at VCET's **Project Showcase** and **Technical Paper Presentation**. [Certificate](#)
- Completed course on **Data Structures and Algorithms in Java** - Certificate. [Certificate](#)
